Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-16 are presented for examination.

Claim Objections

2. Claims 1-16 are objected to because of the following informalities: Claims 1 and 16 recite "HW" and "SW", those abbreviations should be spelled out.

Claim 1 further recites "the SW modules using internal interface to the call control functions of the exchange centre for execution of the functions" which is unclear as what the intention of the claim. Examiner interprets as "the SW modules using internal interface to call control functions of the exchange centre for execution of the functions" for examination purpose. Claim 16 also suffer the same problem of claim 1.

Claim 5 recites "the said applications" online 2, only one of "the" or "said" should be used instead of both.

Claims 6, 10, 11, 12, 13, 14, 15 suffer the same problem as claim 5.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Gbaguidi et al. (Integration of Internet and Telecommunications: An Architecture for Hybrid Services).

As to claim 1, Gbaguidi teaches an exchange centre comprising:

- a first platform (PSTN; Fig. 13 and page 1563, right column, second paragraph), and
- a second platform based on commercial HW and SW (Java Service Layer; page 1567, right column, paragraph 4) and the second platform containing one or more SW modules (hybrid services; page 1567, right column, paragraph 3 and pages 1571, left column, second paragraph) that provide external computers with applications with specific functions via open interfaces (API) (Hybrid Calendar Service; page 1574, right column, section A "Hybrid Calendar Service", Fig. 13, and associated text, common interface; page 1577, right column, paragraph 3), the SW modules using internal interface to call control functions of the exchange centre for execution of the functions (The major functionality ... two endpoints; page 1575, left column, paragraph 2 and The SCP ... to the user; page 1575, right column, first paragraph).

As to claim 2, Gbaguidi teaches the open interfaces are realized on the basis of an object-oriented SW technology (Java technology; page 1577, right column, paragraph 3).

As to claim 3, Gbaguidi teaches wherein the open interfaces can also be used locally by applications on the commercial platform to make use of functions of other applications (The SCP

Art Unit: 2194

is to send an event to the Java Service layer whenever a special trigger is detected; page 1575, left column, paragraph 2).

As to claim 4, Gbaguide teaches wherein a dedicated SW module supports the interworking of the applications on the commercial platform (scpCalendarService; page 1575, right column, paragraph 1 and HybridService ... Internet; page 1572). The interworking SW module provides a platform-internal interface for this purpose (The SCP is to send an event to the Java Service layer whenever a special trigger is detected; page 1575, left column, paragraph 2).

As to claim 5, Gbaguidi teaches wherein the applications involve protocol conversion applications (page 1574, right column, last paragraph – page 1575, left column, paragraphs 1-2 and Fig. 12).

As to claim 6, Gbaguidi teaches wherein the applications involves applications for a higher-level service functionality (Hybrid Calendar Service; page 1574, right column, section A “Hybrid Calendar Services”).

As to claim 7, see rejection of claim 3 above.

As to claims 8-9, see rejection of claim 4 above.

Art Unit: 2194

As to claims 10-12, see rejection of claim 5 above.

As to claims 13-15, see rejection of claim 6 above.

As to claim 16, see rejection of claim 1 above.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
